

CAMP CHICKAWAH

HARRISON · MAINE

New York, September 1954

Dear Mr. & Mrs. Immerman:

It is not a difficult job to submit a report on a boy like Harry. He has progressed further than any other boy his age in camp.

We enjoyed one of our healthiest summers despite the unusual amount of rain and cool weather. Not one boy in the Infirmary. Harry wound up with a gain of only 2 pounds which is good. If you take away the allergy tablets and the small cratches his Infirmary Record Card would be blank.

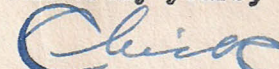

Harry does everything well. Just look at the number of required tests in passed in the various activities:

Swimming: 1st & 2nd Canoe; Red Cross Swimmer.
Archery: Jr Bowman - 60 points.
Baseball: Almost COMPLETE. (many tests).
Basketball: Passing; receiving; dribbling; sets.
Campcraft: Identifications; use of knife; direction; eating out; sleep out; fire test; boat.
Football: Punts.
Golf: COMPLETE except "hitting with control".
Riflery: Pro-marksman - 6 targets.
Tennis: Grips; scoring; definitions; stance; swing; forehand;
Volleyball: COMPLETE - except refereeing.

Harry is a most enthusiastic youngster and just glows with good health all the time. He is most popular in the group and should develop into the best all around camper. We love Harry and hope he stays with us all his camping years.

With kindest personal regards, and with best wishes for the New Year, I am

Sincerely yours,

Joseph C. Saltman
